**Digital Info Security Company Attending Colorado Rural Hospital Conference**

Digital Info Security Company (DGIF) is pleased to announce that we will be attending the 30th Annual Rural Hospital Conference on May 2-4, 2007 in Breckenridge, Colorado. Over 100 hospital administrators from around the state will be attending this year's conference, making it one of the most attended conferences specializing in rural healthcare.

DGIF is pleased to debut our Magic KeyRing Security System at this year's show. Magic KeyRing is DGIF's automated email encryption solution that will assist hospitals in increasing their compliance and security by automatically encrypting emails at their source. Magic KeyRing is also the only solution that gives hospitals the option of archiving their emails for discovery purposes.

Along with DGIF's Magic KeyRing Security System, we will also be demonstrating our Email Archiving and Compliance Solution, Instant Message Archiving and Compliance Solution, and our remote backup and recovery solution, RestoreRex.

Safe Harbor Statement: Matters discussed in this press release contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. When used in this press release, the words "anticipate," "believe," "estimate," "may," "intend," "expect," and similar expressions identify such forward-looking statements. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. These forward-looking statements are based largely on the expectations of the Company and are subject to a number of risks and uncertainties. These include, but are not limited to, risks and uncertainties associated with: the impact of economic, competitive and other factors affecting the Company and its operations, markets, product, and distributor performance, the impact on the national and local economies resulting from terrorist actions, and U.S. actions subsequently, and other factors detailed in reports filed by the Company.
