

## THE CEO'S CORNER

### JAMES CLARK: CHAIRMAN & CEO

#### THE NEXT LEVEL

DISC has experienced a remarkable first quarter this year, with three strategic partnerships underway that have the potential to take our company to the next level.

First, we have been working with 4D Global Partners (4DGP), a company that licenses the "For Dummies" brand from Wiley Publishing. Through this partnership we will be re-branding our RestoreRex™ backup product as a "For Dummies" product.

After exhibiting alongside 4DGP at CES 2008 in January, we began the process of planning the product launch and drafting a marketing and service agreement. A trip to 4DGP's headquarters in mid-March ended successfully with the agreement officially signed and launch plans underway. Under the agreement, 4DGP will provide marketing and distribution services for the product while DISC will manage sales and support services. We are extremely excited about the team that has been established from DISC, 4DGP and Wiley Publishing.

DISC's remote backup product was chosen because of the professional qualities that

distinguish our product from others on the market. These distinguishing factors include:

- Our service that supports our product
  - Live customer support and live product consultants
- The security & redundancies of our data center
- The robust features of our product that support a variety of systems and applications
- The elements of our solution that help clients meet compliance laws and regulations

This is a phenomenal opportunity to benefit from an established and reputable brand that has achieved sizeable market share worldwide. The savings in marketing dollars alone is significant, not to mention the time that it would take to build an equivalent brand.

As most people know, there are millions of "For Dummies" book readers across the globe. We expect that this warm market of existing customers is in need of reliable data storage. With a quality product and a reputable name behind it, we expect the "For Dummies" remote backup product to do very well.

Next, we have strengthened our relationship with DGF MedServ, Inc., a medical billing company that became a reseller of our products in November. DISC and DGF MedServ recently announced that we have taken ownership positions in each other's company. We are also rapidly moving forward together with a marketing program for our encryption product.

Finally, we are pleased to report exciting news regarding our Magic KeyRing™ encryption product. In December we signed an agreement with the Mayor's Development Center of the League of Municipalities of the Philippines outlining a trial of Magic KeyRing™ and other DISC services. The trial is for no less than 100 users for 60 days. With the success of this trial, the potential will become much greater, with over 100,000 possible users within other governmental departments.

#### Milestones

DISC has two distinctive company anniversaries that are upon us. The end of this month marks three years for DISC's emergence from our acquisition of FLI Technologies from Fetter Logic. It also marks one year

from our merger of DISC Colorado into the trading company of DISC Delaware. At that time, all DISC Colorado shares issued before March 31, 2007, excluding shares of officers and directors, will become eligible to have the restriction removed under the rules and guidelines of Rule 144. Shareholders who were issued shares after March 31, 2007 can follow the same process beginning one year from the date of purchase. For more information on Rule 144, here is one helpful website: <http://www.sec.gov/investor/pubs/rule144.htm>

We recommend that you consult your broker or attorney.

Additionally, we have engaged the auditing firm of De Joya Griffith and Company, LLC to audit our financial statements. Once we are a fully reporting company, we will be eligible to move to the OTC and new SEC rules will reduce the time for lifting a legend to six months.

Moving to the OTC and becoming a fully reporting company is part of the next step of going to a major exchange.

## PRESS RELEASE— DISC EXHIBITING AT 2008 INTERNATIONAL CES IN LAS VEGAS

Westminster, CO, January 9, 2008—Digital Info Security Company (OTC Pink Sheets: DGIF) is pleased to announce its presence as an exhibitor at the 2008 International Consumer Electronics Show (CES®), the world's largest consumer technology tradeshow. The tradeshow began Monday and

will continue through Thursday in Las Vegas, NV.

DISC is demonstrating its RestoreRex™ remote backup product at the tradeshow. RestoreRex™ automatically backs up data such as music, video, image, text and database files on a PC or server to a secure Data Center.

DISC is exhibiting with 4D Global Partners, which distributes consumer electronics products under the world renowned "For Dummies" brand. 4D Global Partners collaborates with suppliers, importers, manufacturers and consumer electronics firms by licensing the "For Dummies" brand to

increase sales of CE products.

The DISC exhibit is located in the North Hall of the Las Vegas Convention Center in booth 5335. DISC is proud to be coupled with the successful 4D Global Partners group, and as expected, the response has been laudable.\*

## PRESS RELEASE— DISC ENTERS INTO MEMORANDUM OF UNDERSTANDING WITH MDC IN PHILIPPINES FOR TRIAL OF ENCRYPTION PRODUCT

Westminster, CO, January 10, 2008—Digital Info Security Company (OTC Pink Sheets: DGIF) is pleased to announce that, through its Singapore subsidiary, it entered into a Memorandum of Understanding with the Mayor's Development Center, Inc., the premier training and development arm of the

League of Municipalities of the Philippines, on December 13, 2007.

The Memorandum of Understanding covers a trial period of 60 days for not less than 100 trial users of DISC's Magic KeyRing™ encryption solution and other services provided by DISC.

During the 60-day trial period, both parties will enter into good faith discussions with the end view of finalizing an agreement between them, setting forth the detailed terms and conditions mutually acceptable between the parties upon which the Magic KeyRing™ encryption

solution shall be deployed and maintained.

DISC secured office space in Singapore for its Asia-Pacific headquarters in June of last year. The office will provide a full range of IT services supported by a secure Data Center.\*

## PRESS RELEASE— DISC SIGNS LETTER OF INTENT WITH 4DGP—DISC'S REMOTE BACKUP TO BE MARKETED UNDER "FOR DUMMIES®" BRAND

Westminster, CO, February 14, 2008—Digital Info Security Company (OTC Pink Sheets: DGIF) is pleased to announce continued progress with 4D Global Partners in distributing its professional remote backup product under the "For Dummies®" brand.

4DGP have moved forward in their relationship by signing a Letter of Intent. DISC has paid advanced royalties (in escrow) to commence the joint marketing effort.

DISC's professional online backup manager automatically backs up data on a PC or server to a secure Data Center. Files can be easily

retrieved 24/7 from any location with an internet connection. The solution is geared towards small to mid-sized businesses and offers professional IT support and world-class data center reliability.

4D Global Partners sells and markets consumer electronics products under the world

renowned "For Dummies®" brand. Under its agreement with Wiley Publishing, 4DGP holds a license for the use of the "...For Dummies®" logo, icons, characters, style, design, trade names, and proprietary structure and format for data storage products and solutions.\*

Since exhibiting together at the CES in January, DISC and

SAFE HARBOR STATEMENT: This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Terminology such as "anticipate," "believe," "estimate," "may," "intend," "expect," and similar expressions identify such forward-looking statements. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. These forward-looking statements are based largely on the expectations of the Company and are subject to a number of risks and uncertainties. These include, but are not limited to, risks and uncertainties associated with: the impact of economic, competitive and other factors affecting the Company and its operations, markets, product, and distributor performance, the impact on the national and local economies resulting from terrorist actions, and U.S. actions subsequently, and other factors detailed in reports filed by the Company.

## PRESS RELEASE—DIGITAL INFO SECURITY COMPANY AND DGF MEDSERV TAKE OWNERSHIP POSITIONS IN EACH OTHER

Westminster, CO, February 26, 2008—Digital Info Security Company (OTC Pink Sheets: DGIF) is pleased to announce further advancement in its partnership with DGF MedServ, Inc. The two companies have agreed to take ownership positions in each other's company and are rapidly moving forward in

their marketing plans.

DGF MedServ and Digital Info Security Company (DISC) began a strategic partnership in October 2007 when DGF MedServ became a reseller of DISC's IT solutions to serve the medical industry. The relationship permits DISC to service

clients worldwide, while equipping DGF MedServ with an expanded product offering for its customers and the opportunity to leverage DISC's Singapore facility.

With an established network and client base of hospitals, clinics and other health care entities, DGF MedServ

provides an excellent opportunity for increased sales of DISC's HIPAA compliant Magic KeyRing Security System™ encryption product, secure email and data backup services, and full line of IT solutions.\*(Page 2)

## DISC PROFESSIONAL REMOTE DATA BACKUP MANAGER: THE INTELLIGENT ONLINE BACKUP CHOICE FOR BUSINESSES

Businesses of all types and sizes are seeking an efficient way to manage the ever-increasing government and industry regulations for data storage. There are many companies offering remote backup services, but not all solutions on the market are suitable for the business user.

When considering an online or remote backup service, it's important to choose the provider that offers features that are essential to small and medium-sized businesses today. Not only do businesses need to manage their own data, but they are also often responsible for their clients' data, which makes it critical that they select a professional solution.

DISC is dedicated to providing a professional-class remote backup service that exceeds the needs of small and medium-sized businesses. The following features set DISC apart from the competition:

**Regulatory Compliance** – DISC's Professional Remote Backup is compliant with provisions of HIPAA, the Sarbanes-Oxley Act and the Gramm-Leach-Bliley Act. The

automatic nature of the solution makes it an easy-to-use, low maintenance tool for businesses that must meet regulatory data storage compliance requirements.

**Security** – DISC's Professional Remote Backup uses the latest in security procedures and encryption processes to ensure the security and integrity of your data.

**State-of-the-art data center** – DISC's world-class data center enhances the security of your data storage; you can rest assured that your critical information is stored safely at an off-site location featuring the latest technical infrastructure, security features and redundancies. DISC specializes in providing automated services and implements industry best practices to safeguard your data.

**Service and Support** – Our support staff is available to assist you and to meet special needs. If you have a large amount of data, we can help you with alternative methods of performing your initial backup, such as mailing out a hard drive so that you can perform your initial backup to a local drive. We also offer an Express Restore service, in which we will overnight your data to you for quick recovery.

**Remote Data Backup Manager – Client Features** –

- Automatically backs up your data on a monthly, weekly, or daily basis, without tapes or CDs
- Restores your critical information after a catastrophic failure
- Sends an email report letting you know your backup was successful
- Data is always instantly available online 24/7

- Professional Remote Backup supports most current operating systems and platforms including Windows, Linux, Mac, NetWare, and UNIX, and also supports popular database applications, including:

- Microsoft Windows
- Microsoft Exchange
- Microsoft SQL Server
- Lotus Domino/Notes
- Oracle Database
- My SQL Database

Protecting your critical business data has never been as easy and secure; and to prove it, DISC is offering a 60-day free trial.

DISC Professional Remote Backup is the secure, affordable, intelligent choice for professional offsite backup.

## Stress Free IT Outsourcing Solutions

## PARTNER SPOTLIGHT—CEP ADVANTAGE

Over the past couple of years DISC has formed a number of valuable relationships by establishing referral partners and resellers. Referral partners refer clients to DISC and DISC services the clients, while resellers sell DISC products to their own client base. Joining forces with other successful business professionals is an important part of our sales strategy and integral to the growth of our business.

These relationships are mutually beneficial to both DISC and the partner. DISC's solutions and data center often complement the services of IT consultants and IT professionals, allowing them to expand their product offering, while IT consultants often introduce DISC to new

markets and contacts.

In this edition, we are spotlighting one of our valued partners, CEP Advantage, and Brenda Shaffstall, Executive Project Manager at CEP.

CEP Advantage specializes in delivering smart, value added websites to financial services professionals. CEP creates an online presence that establishes a brand and brings in new business for financial advisors. CEP has the expertise to get a site noticed by searchers and to help grow business.

CEP recognized the opportunity to further serve its clients by teaming up with DISC in order to offer Email

**CEPAdvantage.com**  
Advisor Solutions - Web Design & Hosting

Archiving and Compliance solutions alongside its web services. Because the financial services industry is heavily regulated, email compliance is a top concern and compliance solutions are in demand. CEP clients are now able to benefit from product packages that can meet a variety of their IT needs, from first-rate web design to compliance tools.

CEP has set the standard for

the caliber of company with which we prefer to partner. The DISC team has enjoyed working closely with Brenda, who has promoted DISC to many professionals in the financial services industry. We look forward to continuing our shared success with Brenda and CEP.

More information on CEP Advantage can be found at [www.cepadvantage.com](http://www.cepadvantage.com) or by calling 866-554-8542.
