

Instant Message Archiving & Compliance

Instant messaging is an important communication tool for many businesses. Like email, instant messaging is subject to compliance laws and regulations. DISC's Instant Message Archiving and Compliance solution is an affordable, efficient tool for managing instant message compliance obligations.

DISC's Instant Message Archiving and Compliance solution:

- **Monitors** a majority of the Instant Message platforms available on the market today, including Bloomberg messaging
- **Flags** messages that violate Lexicon words and phrases
- **Archives** IM "conversations" for compliance purposes by storing messages in WORM (Write Once, Read Many) class media in an unalterable state
- **Searches** for IM "conversations" by various fields such as date, platform, keywords, and screen name with an easy to use web interface
- Allows for **downloading** and **saving search data** for auditing purposes
- Helps organizations **comply** with SEC Rules 17a-3 and 17a-4, the Sarbanes Oxley Act, the Gramm-Leach-Bliley Act, NASD Rules 3010 and 3110, and HIPAA

The screenshot shows a web interface with a navigation menu at the top: HOME, SEARCH, REPORTS, STATISTICS, MANAGE USERS, HELP. Below the menu is a "Home" section with a search filter: [Current|Previous] [Day|Week|Month|Quarter|Year] OR [Absolute]. The main content area displays "System Properties" with a table of statistics:

	Messages	Files
Total	144	0
Sent	72	0
Received	72	0

Below the table, there are several rows of statistics:

Time in Conversations	5h 11m 12 s
Infected Files Sent	0
Infected Files Received	0
Events Blocked	0
Events Flagged	0
