

## Secure Offsite Data Backup

### Business class data backup and recovery

RestoreRex® is a professional, economic, automatic solution for protecting your data. Streamlining the backup process, RestoreRex™ runs automatically in the background to backup your data on the schedule that you set.

With two restore channels available, recovering files is fast and easy. Users can navigate to files either through the software on their local machine or through the web-interface. This allows data to be restored to any PC, laptop or server at your convenience.

### Security

Your critical data is encrypted (256-bit), compressed, and then uploaded to a REMOTE server in our data center via SSL, guaranteeing security. Additionally, only you hold your encryption key to access your data.

### RestoreRex Clients

Two editions of RestoreRex are available to meet the needs of different users.

#### RestoreRex Online Backup Manager - OBM (Server Edition)

A comprehensive client side backup application bundled with various database backup modules for backing up files and databases from client-side computers to DISC's offsite backup server, RestoreRex OBM is most suitable for backing up servers.

#### RestoreRex A-Click Backup - ACB (PC Edition)

A light version of RestoreRex OBM with all major features retained while having an easy-to-use interface, RestoreRex ACB is most suitable for backing up desktop and laptop computers.

### KEY BENEFITS

- Quickly restore your critical information 24/7
- Eliminate tape, CD, or DVD backups, which can be lost or destroyed and make data retrieval difficult/time consuming
- Protect company information in case of disaster by securing it in an offsite location
- Access files while out of the office
- Free up time due to automated backups
- Address regulatory compliance guidelines: HIPAA, SOX, GLB

### KEY FEATURES

- Auto backup at your desired time
- Easy file recovery through the software or the web-interface
- Security features and encryption processes secure your data
- Data compression for quicker backups and less storage space
- Easy monitoring with extensive backup status reports
- Supports all common operating systems and platforms
- Restore to any version of backed up files
- Complete protection even when files are opened
- Run any application before or after a backup job
- Auto upgrade your software without human intervention
- Able to back up individual emails
- Backup servers and databases
- Create a local backup copy if desired

### Data Security

- Data encryption: 256MB
- Option for SAS 70-certified data center storage
